SUMMARY

Self-taught Frontend Developer with hands-on experience building responsive and interactive web applications using React, JavaScript, HTML, and CSS. Skilled in developing reusable component-based applications, implementing responsive user interfaces, and deploying projects from concept to production. Built a React-based e-commerce application and personal portfolio website while following modern frontend development practices. Currently expanding my expertise in API integration and AI-powered web applications. Seeking internship, junior frontend developer, and freelance opportunities to contribute to real-world projects and grow as a software developer.

PROJECTS

E-Commerce Website

Developed a responsive e-commerce web application using React, JavaScript, HTML, and CSS. Built reusable React components, implemented product listings, product detail pages, category filtering, shopping cart functionality, and checkout workflow using React state management. Designed, developed, and deployed the project independently with a focus on responsive design and user experience.
